I recently had an outstanding experience with P&P HVAC thanks to Sam and Alex ! When my heating system went out at the restaurant and my house in the same 2 days , I called them for help, and they responded promptly. To my relief, they were able to identify the

What surprised me even more was their efficiency. They quickly ordered the necessary part and returned the same day to fix the issue, ensuring my home was comfortable again in no time. The quality of service provided by Sam and Steve was exceptional, and they were professional and courteous throughout the entire process.

On top of their fantastic service, I found their prices to be extremely fair—an excellent value for such high-quality work. I highly recommend this HVAC company to anyone in need of reliable and speedy service. Thank you, Sam and Alex, for making a stressful situation so much easier!

We had an issue with our old central air conditioner. We called P&P HVAC to come check it out. We had some cold air, but not how it should be. I told them no rush as we were in the middle of several weeks of extreme heat. They came the very next morning. They quickly accessed the issue. The issue would be an expensive fix as as

units. We choose the more expensive (but IMO better option) Trane Heat Pump. They scheduled an install for a week later. When the time came, they arrived and 3 of them worked hard all day. At the end, we had a fantastic unit. It looks great, with the lines running straight and tied off properly.

Workmanship was the best I have seen from an HVAC company. The unit was supplied with an Ecobee smart thermostat, which they set up for me.

I am very pleased with every aspect of the diagnosis of the old unit, and with the installation of the new heat pump.
